

# Maxwell Nyimbili

## Your site, built by someone who actually cares how it turns out.

I'm a full-stack developer and AI engineer taking on a small number of freelance projects. If you've got an idea for a site or product, let's talk about bringing it to life, properly, from the backend up.

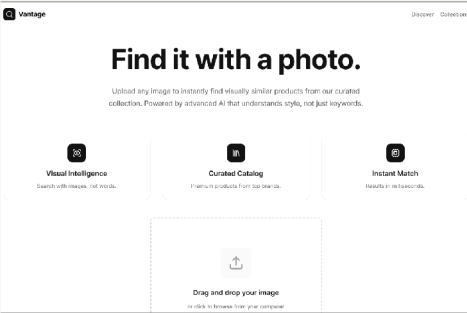

### SERVICES

|                                                                                                                                       |                                                                                                                                      |                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| <b>Portfolio &amp; Personal Sites</b><br><br>For creators, professionals, and students who need a site that actually represents them. | <b>Business &amp; Landing Pages</b><br><br>Marketing sites, product pages, and small-business presence that loads fast and converts. | <b>Full-Stack Web Apps</b><br><br>Custom tools, dashboards, and e-commerce, anything beyond a static site. |
|---------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|

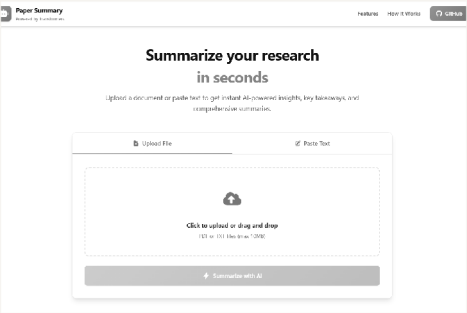

### HOW IT WORKS

|                                                                                |                                                                                         |                                                                                       |                                                                               |
|--------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| <b>01</b><br><b>Discovery</b><br><br>Understand the goal, audience, and scope. | <b>02</b><br><b>Design</b><br><br>Layout and visual direction, signed off before build. | <b>03</b><br><b>Build</b><br><br>Development with regular check-ins, not a black box. | <b>04</b><br><b>Launch</b><br><br>Deployed, tested, and handed off with docs. |
|--------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|

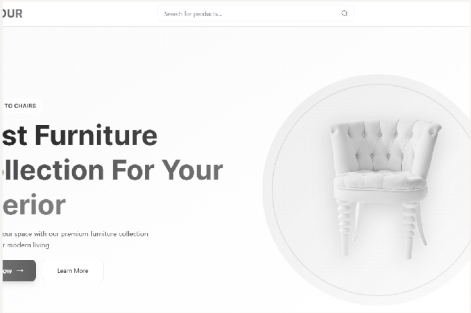

### SELECTED WORK

**Vantage FotoFinder**  
AI-powered visual search

**Paper Summary**  
Research synthesis engine

**Mini E-Commerce**  
React + Node + Mongo

## Got a project worth building well?

Pricing depends on scope, so let's start with a quick conversation. Fill out the form on the contact page and tell me what you're building; I'll follow up within a day or two.
